GBM: independent seeds agree with theoretical orders
terminal L1 price error [price units]
step h [year]
EM mean error
EM fit
95% seed-mean fitted band
reference order 0.5
Milstein mean error
Milstein fit
95% seed-mean fitted band
reference order 1
Non-affine EM: finite-reference half-order regime
terminal L1 price error [price units]
step h [year]
nonaffine mean error
nonaffine fit
95% seed-mean fitted band
reference order 0.5
